Fruit Tree/Plant Selections

R = Rootstock
H = Height at Pickup
BT = Blooming Time
RT = Ripening Time
C = Color
O = Other

HONEYCRISP (bareroot)

This popular variety tested #1 in taste, and is known for being a very crisp and juicy apple. A large fruit that averages over 3 inches, it has excellent keeping qualities allowing it to store up to 6 months in a normal refrigerator. Honeycrisp was developed in 1960 by crossing Macoun & Honeygold varieties. It exhibits great winter hardiness making it ideal for northern regions. The tree shows moderate resistance to apple scab and fire blight, and will pollinate all other apple varieties.

R G.969
H 4-5 ft
BT Mid-season
RT Mid-September
C Orange-Red on Yellow background
O Semi-dwarf rootstock produces a free-standing tree that shows resistance to fire blight, crown rot, and wooly apple aphid

FUJI (bareroot)

This well-known apple is a Japanese cultivar developed in the 1930's, and released commercially in the 1960's. Trees produce moderate size apples, but should be grown in full sun to ensure proper ripening. Apples have a sweet-tart flavor, and are good for both raw and cooked uses. If stored properly, Fuji apples will keep for 4 to 6 months or longer..

R G.890
H 4-5 ft
BT Mid-season
RT Mid-October
C Yellow-green base with Red-pink striping
O Semi-dwarf rootstock that shows resistance to fire blight, crown rot, and wooly apple aphid

JULY PRINCE (bareroot)

A yellow free stone peach, July Prince produces a medium to large fruit. Peaches are juicy, sweet, with a mild tartness. This variety is a fast-growing tree. Peaches self-pollinate, and do not generally require staking. Prune trees to have a base, or open center, which allows all work to be done from ground level. Peaches prefer well drained, sandy loam soils, and are intolerant of wet, poorly drained conditions.

R Lovell
H 4 ft
BT April
RT Early to Mid August
C Yellow freestone
O Lovell rootstocks result in 15-25 ft. trees, if unpruned. This standard rootstock provides good anchorage and high disease resistance to trees. Lovell is more tolerant of wet soils than some other peach rootstocks.

PEACH

JEWEL STRAWBERRY

(bundle of 25 plants)

Fragaria ananassa

Berry Size: Large
Best in Zones: 4-8
Firmness: Firm
Freezing Quality: Excellent
Bare Root
A soil pH level of 6.5 - 6.8 for strawberry plants. This June Bearing Strawberry Plant bears fruit 1 year after planting. Easy to grow! Consistent plants with large berries, ready for midseason after first year.

STRAWBERRY

APPLE

A/S = Age/Size
G = Growing Conditions
C = Characteristics

Description of Tree Sale Items

FS = Full Sun
PS = Partial Shade
S = Shade

COLORADO BLUE SPRUCE

(bundle of 10 trees)

Picea pungens

A/S 2 yrs. / 9-15"

- G FS, best in most soils, moderate tolerance to flooding/drought.
- C Stiff silvery-blue 1" needles, densely foliated. Matures 30'-60' tall & 10'-20' spread. Slow growth rate.

CONCOLOR FIR

(bundle of 10 trees)

Abies concolor

A/S 2 yrs. / 5-10"

- G FS, best in well drained soils, drought resistant.
- C Needles silvery blue-green, 2-3 inches long. Pyramidal shape, holding a dense, formal shape with age. Matures 50'-75' tall & 20'-30' wide. Slow to medium growth rate.

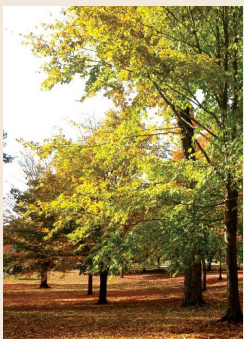

EASTERN WHITE PINE

(bundle of 10 trees)

Pinus strobus

A/S 2 yrs. / 7-10"

- G FS/PS, best in acidic, moist, well drained, or dry soils, sensitive to salt.
- C Hardy, valuable tree. Clustered soft blue-green needles. Ideal screen or windbreak. Likes moist/well drained soils. Matures 50-80 feet with a 20-40 foot spread.

AMERICAN BEECH

Fagus grandifolia

A/S 2 yrs. / 12-18"

- G FS, best in acidic, loamy, moist, sandy, silty loam, well drained, or clay soils. Drought sensitive!
- C Wide spreading canopy provides great shade, bronze color in fall, smooth bark through adulthood. Medium growth speed, prefers full sun. Matures 50'-75'.

RED MAPLE

Acer rubrum

A/S 3 yrs. / 12-18"

- G FS, best in acidic, loamy, moist, rich, sandy, silty loam, well drained, or clay soils. Prefers wet conditions but has slight drought tolerance.
- C Year round color. Fast growing and tolerant, matures 40 to 60 feet tall. Not for use around horses.

RED OAK

Quercus rubra

A/S 1 yr. / 12-18"

- G FS, best in acidic, loamy, moist, sandy, well-drained, or clay soils. Drought tolerant.
- C Versatile and hardy, fast growing with excellent fall color. Excellent value for wildlife. Matures to 75' tall.

RIVER BIRCH

Betula nigra

A/S 1 yr. / 12-18"

- G FS/PS, best in acidic, loamy, moist, sandy, well drained, wet, or clay soils. Flood/Drought tolerant.
- C Reddish brown exfoliating bark provides ornamental value. Often grows along streams. 50'-70' tall at maturity with medium to fast growth rate.

SHAGBARK HICKORY

Carya ovata

A/S 3 yrs. / 6-12"

- G FS, best in acidic, alkaline, loamy, moist, rich, sandy wet, or clay soils. Drought tolerant.
- C Long lived and straight growing, provides excellent shade, and is named for its bark which peels away in large curving plates, giving a shaggy appearance. Produces edible nuts. Matures 60-80 feet tall.

SYCAMORE

Platanus occidentalis

A/S 1 yr. / 12-18"

- G FS/PS best in acidic, moist, well drained, or wet soils. Drought tolerant.
- C Rapidly growing, up to 100 feet tall with a 40 to 70 foot spread. Has white patchy bark and is excellent near water. Excellent for providing shade

BUTTONBUSH

Cephalanthus occidentalis

A/S 1 yr. / 12-18"

- G FS/PS, best in moist/wet soils.
- C Multistemmed shrub grows 6-12 ft. Bladed leaves with a glossy surface. Flowers are a distinctive sphere growing in cluster, generally white or pale pink.

Description of Tree Sale Items

DOWNY SERVICEBERRY

Amelanchier arborea

A/S 1 yr. / 12-18"

- G** FS/PS, best in moist, well drained, or acidic soils.
- C** All year color, excellent for native birds in the summer. White flowers in spring, excellent fall color. Grows 15-25 feet tall at a moderate speed.

PAW PAW

Asimina triloba

A/S 2 yrs. / 6-12"

- G** FS/PS, Shade young trees 1-2 years. Best in acidic, fertile, well drained soils. Flood sensitive.
- C** Dark purple flowers in spring, large edible fruit in summer, yellow/green foliage in fall. Good for full sun or part shade, grows 15-20 feet tall at a slow speed. Usually hard to find in nurseries!

REDBUD

Cercis canadensis

A/S 1 yr. / 12-18"

- G** FS/PS, best in moist, well drained soils. Drought tolerant.
- C** Shape is rounded to broad & flat-topped. Matures 20'-30' tall & 25'-35' wide. Lavender pink colored buds in early spring.

SPICEBUSH

Lindera benzoin

A/S 1 yr. / 12-18"

- G** FS/PS, best in moist, well drained soils. Drought tolerant.
- C** Single or few-stemmed shrub, matures 6'-12' tall, with glossy leaves and slender light green branches. Dense clusters of pale yellow flowers.

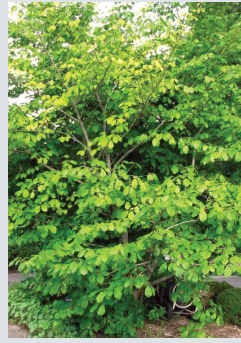

WINTERBERRY

Ilex verticillata

A/S 1 yr. / 12-18"

- G** FS/PS, best in acidic, loamy, moist, rich, sandy, silty loam, or well drained soils.
- C** Bright red fruit persists in the winter, glossy dark green foliage in summer, yellow in fall. Both male and female plants needed for fruit. Grows 3-8 feet tall, and is excellent for wet areas.

WITCHHAZEL

Hamamelis virginiana

A/S 2 yrs. / 6-12"

- G** FS, best in loamy, silty, or well drained soil.
- C** Large shrub with irregular branching habits. Large rounded leaves with yellow flowers blooming in late fall. Attractive to native birds, tolerant of road salt and clay soil. Grows 8-15 feet tall at moderate speed.

ACHILLEA "Desert Eve Red"

Achillea millefolium

S 1 qt pot

- G** FS/PS, best in average garden soil, well drained. Sensitive to water-logging.
- C** Masses of long-lasting clusters of red flowers with gold centers. Aromatic, green foliage. Blooms early/late summer. Grows 2ft tall, 2ft wide.

AGASTACHE "Arizona Series"

Agastache aurantiaca

S 1 qt pot

- G** FS, best in average garden soil, well drained.
- C** Produces an abundance of spikes packed with flowers, requires little care, and is excellent for hummingbirds. Grows 8-10" tall, 8-10" wide. Blooms early summer to late summer.

COLUMBINE "Winky" Series

Aquilegia vulgaris

S 1 qt pot

- G** FS, best in moist but well drained soils. Prefers sandier/lomier soils. Clay not tolerated.
- C** Many upward facing bi-color flowers, including blue, white, red, purple, and rose. Grow to 16-18 in. tall, and 12-18 in. spread. Bloom in spring to early summer.

LAVENDER "Munsted & Phenomenal"

Lavandula angustifolia

S 1 qt pot

- G** FS, best in low/moderately fertile soils, well drained, neutral to slightly alkaline soil.
- C** Tall green stems ending with a purple cluster of flowers, cold hardy and heat/drought tolerant. Pollinator friendly, deer resistant, blooms in mid-summer.

A/S = Age/Size
G = Growing Conditions

Description of Tree Sale Items

FS = Full Sun
PS = Partial Shade
S = Shade

LUPINE "Mini Gallery Mix"

Lupine polyphyllus

- S** 1 qt pot
- G** FS, best in rich, fertile, slightly acidic, well drained soils.
- C** Tall flowers shoot up from spear-shaped leaves. Gallery mix can include red, yellow, or purple. Improve fertility of soils. Grow 14-16" tall. Blooms late spring through July.

SEDUM "Autumn Joy"

Hylotelephium telephium

- S** 1 qt pot
- G** FS/PS, grows well in poor/sandy soils, but must be well drained.
- C** Gray/Green succulent-like leaves blooming in late summer to fall with small, pink, star-shaped flowers growing in clusters along the stems. 1-2 ft tall, 1-2 ft wide.

VERONICA "Royal Candles"

Veronica spicata

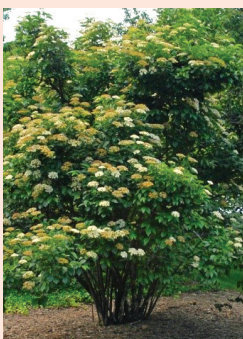

- S** 1 qt pot
- G** FS, grows best in moderately fertile, well drained soil.
- C** Upright growing with large spikes of purple-blue flowers. Blooms in summer to a height of 10-12 in. and 12-15 in. wide.

LITTLE BLUESTEM "The Blues"

Schizachyrium scoparium

- S** 2-4" barefoot
- G** FS, best in moist, well drained soils. Will clump in dry soil.
- C** Prairie grass with blue foliage accented by red stems. Other colors appear in fall, including purple, orange, and many shades of blue. Grows upright, clumping. Easy care.

ARROWWOOD

Viburnum dentatum

- A/S** Containerized seedling
- G** FS/PS, tolerates most soils/pHs, prefers moist, well drained soils.
- C** Grow from six to as much as 10-15 feet tall and wide. Large, coarsely toothed leaves are usually glossy with flat-topped, four inch wide clusters of tiny white flowers that appear from late spring to early summer. The flowers are followed by blue-black fruit. In fall, the leaves turn yellow, red, or purple-red.

HONEY LOCUST

Gleditsia triacanthos

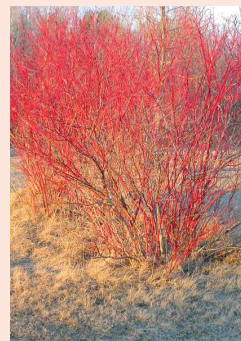

- A/S** Containerized seedling
- G** FS, best in deep, moist, fertile and neutral soils. Moderately tolerant of drought/flooding.
- C** Fast growing tree with fragrant spring flowers. Matures 30'-70' tall. Honey locust is used extensively by wildlife. The bean pods are a favorite food of the white-tailed deer, squirrels, rabbits, hogs, opossums, and raccoons.

HORNBEAM

Carpinus

- A/S** Containerized seedling
- G** PS, best in deep, fertile, moist, acidic soils. Will not tolerate compacted soils.
- C** Small/Medium tree with smooth gray bark, drooping flower clusters which form in autumn but open in spring. Matures 30'-40' tall.

RED OSIER DOGWOOD

Cornus sericea

- A/S** Containerized seedling
- G** FS/PS, best in moist to wet soils.
- C** Multistemmed shrub, 6-12 ft tall, with bright red twigs. Dense clustered blossoms followed by pea-sized white berries. Colorful foliage in autumn, red branches offer significant winter color.

LIRIOPE Groundcover

(18 plants/flat)

- G** FS/PS/S, best in moist, well drained soils. Will endure heat, drought, salt, sand or clay. Will not grow well in wet conditions.
- C** Short evergreen perennial ground cover. Grows to 6" tall and 3' diameter. Small blue-purple flowers.

CAREX PENNSYLVANICA Groundcover

(15 plants/flat)

- G** PS, best in moist, well drained soils.
- C** A tufted, tuberous-rooted, grass-like perennial growing 12"-18" tall. Showy flowers spikes with purple flowers in late summer and blackish berries.
