

LANCASTER COUNTY CONSERVATION DISTRICT

MONTHLY BOARD MEETING AGENDA

Wednesday, December 4, 2024

Lancaster Farm & Home Center

Zoom Info: <https://zoom.us/j/91731607863>

Business Meeting 7:30 pm

Timer

7:30	Invocation – Gordon Hoover Call to Order, Vice-Chairman, Roger Rohrer Welcome & Introductions – Roger Rohrer Additions to the Agenda – Christopher Thompson Public Comment: Survey media/guests: Agenda items of interest – Roger Rohrer	
7:40	I. <u>Agency Reports</u> 2. PA DEP Field Rep Report (attachment)	1
8:20	IV. <u>Reports & Information</u> 2. E&S/NPDES Monthly Projects Report – Stern (attachment).....	5
	<u>Addition to Board Packet:</u> 6. 75 th Anniversary Recognition – Gregory (attachment)	10

Item I.2
**December 2024 DEP Conservation District
Field Rep Talking Points**

2025 Conservation District Director Nominations

Information packets for 2025 Conservation District Director nominations and appointments were sent out to county chief clerks and copies went to district managers. District managers are encouraged to contact chief clerks to discuss the 2025 nomination process and to answer questions regarding upcoming vacancies on their board. Appointments are due to the State Conservation Commission by December 15. Conservation District Field Representatives and the State Conservation Commission are available to answer questions concerning the director nomination process.

Manure Management Manual Question & Answer Document

DEP will be looking to publish a Question & Answer document related to the Manure Management Manual Revisions and the new MMP Short Form that were published in April 2024. The Program has received some questions through the regional Q&A sessions that will be included in the document, but we want to give anyone who may still have questions the opportunity to get them answered. We will begin compiling the Q&A document in the new year. We are asking that anyone who may have questions related to the Manure Management Manual revisions and the MMP Short Form to send them to Nathan Radabaugh at Nradabaugh@pa.gov by January 1, 2025 in order to have them included in the Q&A Document.

Updated SOP for Routine Ag Inspections and Complaints

November 15 an update was held on the Standard Operating Procedure (SOP) for Routine Ag Inspections, Complaint Investigation, and Follow-up for the Conservation District Ag Staff. The session included discussions on key recommendations from the Ag 102 Focus Group, and how that feedback was incorporated in the SOP and corresponding Inspection Report. The session was recorded and is now available on Clean Water Academy for review for any staff that was unable to attend. Once the SOP is approved internally and corresponding training is developed, it will also be available with this course.

The course title on CWA is “Standard Operating Procedure for Agriculture Routine Inspections, Complaint Investigation and Follow-up” and can be found here [Course: Standard Operating Procedure for Agriculture Routine Inspections, Complaint Investigation, and Follow-up](#)

NEW Wetland Determinations Training Course in CWA

The Bureau of Waterways Engineering and Wetlands’ Division of Wetlands Encroachment and Trainings developed a comprehensive 8-hour training, done over 6 courses, on wetland determinations. This training was done in collaboration with the Army Corps of Engineers (ACOE), Western Pennsylvania Conservancy (WPC) and the Natural Resources Conservation Services (NRCS). This training will be expanded over the next two years with current collaborators to eventually be a complete resource on wetland determinations within the state of Pennsylvania.

This training will give participants a basic understanding of how to properly recognize wetlands in Pennsylvania and at the conclusion they will be able to identify and evaluate the three components that make up a wetland; hydrology, hydrophytic vegetation and hydric soil. This training was designed specifically to meet DEP’s regulatory programs related to wetland identification and the 1987 Army Corps of Engineers Wetland Delineation Manual and the associated Regional Supplements. This training is not a substitute for field experience, and is meant to be foundational educational information. These lessons do not cover all wetland topics, terms, or other information but are meant to provide relevant training for DEP and the public.

This training is available for all staff and public to access on the Clean Water Academy (CWA) as a valuable resource on wetlands in the state of Pennsylvania. Check out the training at this link: [Course: Introduction to Wetland Determination - 2024](#)

Streamlining Permits for Economic Expansion and Development (SPEED)

The SPEED program requires the use of qualified professionals (QPs) to augment DEP and CCD staff for the review of Chapter 102 permit applications and NOIs, as well as certain Chapter 105 applications, dam safety, and air quality approvals. The QP Information For Bid (IFB) was posted on October 4, 2024, and ends December 31, 2024. A workgroup consisting of Chapter 102 CCD and DEP staff has been formed to develop guidance on SPEED implementation and will be meeting monthly for the foreseeable future. DEP is also holding monthly statewide calls with Chapter 102 staff to answer questions about how SPEED may impact the Chapter 102 program. Please be on the lookout for invites to these meetings, and in the meantime, you may continue to send questions to RA-EPCHAPTER102@pa.gov.

2024 PAG-02 General Permit

The final PAG-02 General Permit was published in the *Pennsylvania Bulletin* on August 31, 2024. The permit went into effect on December 8, 2024. Any projects that did not receive an approved Notice of Termination (NOT) or submit a Renewal NOI by December 7, 2024, are considered to be operating without an NPDES permit and subject to enforcement. District staff should reference the 2024 PAG-02 Permit section of the 102 Resource Center in Clean Water Academy for all PAG-02 needs, including the Compliance Strategy SOP for permittees who did not meet the December 7th deadline.

A PAG-02 General Permit Course has been created in Clean Water Academy and made available to the public. A Clean Water Academy user login is not required to access this course unless the individual desires a course completion certificate. This course includes explanations of the differences between the 2019 and 2024 versions, how to complete the NOI, the permit requirements, and more. The course can also be found by searching for “PAG-02” in Clean Water Academy. Please inform the general public and regulated community about this resource!

Chapter 102 ePermitting

On October 10, 2024, the transition to stop use of the Clean Water Chapter 102 ePermit System was announced via email. As of December 8, 2024, users can no longer submit applications or Notice of Intent (NOI) within the ePermit system for Chapter 102 permits administered by DEP’s Bureau of Clean Water (Individual NPDES Permit, PAG-02 General NPDES Permit, Individual E&S, and ESCGP-4). Applications and NOIs submitted in the system will be allowed to move through the permit review process to issuance. *This notice does not apply to E&S applications or ESCGP-4 NOIs submitted to DEP’s Oil & Gas Program, which will continue to use ePermit.*

Individual NPDES Permit

The construction stormwater Individual NPDES Permit was updated on November 15th to include many of the elements found in the 2024 PAG-02, and is also available in the 102 Resource Center. The new permit template will be used for all New and Major Amendment issuances starting on December 8th. The Individual NPDES Permit application and associated documents were also updated and released in early December. Applicants are expected to use the new forms start March 8, 2025.

Keystone Environmental ePermitting System (KEES)

BCW has partnered with PennDOT to bring Chapter 102 PennDOT application reviews to the KEES platform, similar to the Chapter 105 program. This does not replace the Chapter 102 ePermit system, but instead provides a successful mechanism for electronic review of PennDOT applications. The KEES Individual NPDES Permit review was released November 21st, but staff are not expected to use it until training is provided by PennDOT. PennDOT will be providing both virtual and regional training opportunities to ensure CCDs receive proper training on the system, likely starting with the southcentral region and associated CCDs. Please be on the lookout for these training announcements.

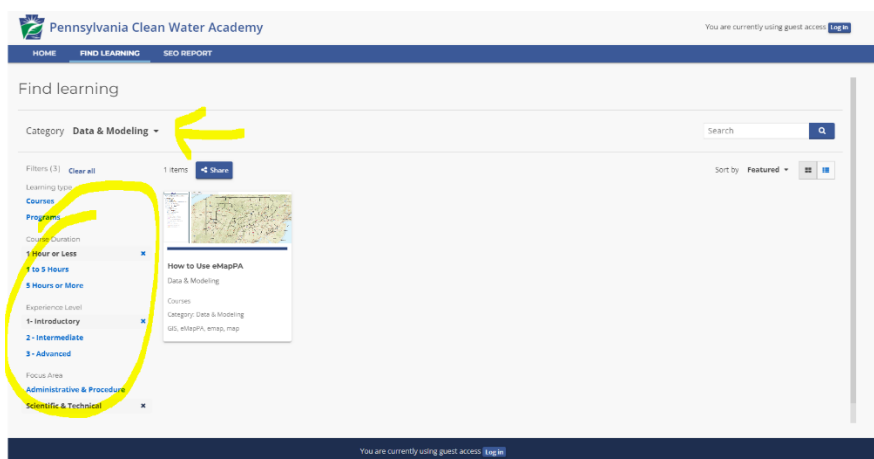

KEES PAG-02 review and Individual NPDES Permit review enhancements are expected to rollout in February 2025. Until then, staff should continue to accept KEES-generated PDFs and/or standard “paper” submissions for all PAG-02 PennDOT submissions.

DRAFT NOT SOP Request for Comments – On November 26, Krista Brown sent the Updated NOT SOP to Conservation Districts for Comments. Conservation Districts should submit comments no later than January 6, 2025 to RA-EPCHAPTER102@pa.gov

Use of the NOT SOP once finalized, will begin on March 8, 2025 to coincide with when permittees are expected to begin using the updated NOT form. The Program anticipates having training in February to review the finalized SOP as well as provide an opportunity for District Staff to ask questions.

Clean Water Academy

CWA “FIND LEARNING” Page to Add Filters - Clean Water Academy is in the process of assigning Filters to all courses on the FIND LEARNING Page. These filters will allow learners to filter the various Course Categories by Course Duration, Course Experience Level and Focus Area. For example a Learner will be able to choose the Category of Water Resources\Data & Modeling and Filter for content of ‘1 Hour or Less’, ‘Introductory’ and ‘Scientific and Technical’. Course’s will slowly be assigned filters over the next couple months as PA Clean Water Academy works with the various programs on course filter assignments. Additional filter options are being explored. Suggestions for other filters are welcome.

Managers and Other Supervisory Staff May Activate the TEAMS Tab in Clean Water Academy – The TEAMS tab in CWA allows managers to create training programs and assign courses to their staff. To update or activate the TEAMS Tab click on the Attachment B and Other Forms Quick Link. Next click on the “Request TEAMS Tab update or Add”

Chesapeake Bay Program

CAP Implementation and Coordinator Grants - The CAP Program is anticipating the announcement of the CAP Implementation and Coordinator Grants in Early December.

Cap Program to Transition to Practice Keeper from FieldDoc –

- Effective December 31, 2024, the CAP program will no longer use FieldDoc to track and report CAP-funded projects. All future CAP-funded projects must be reported through PracticeKeeper. County partners will retain full access to their FieldDoc accounts until December 31, 2024. However, we strongly encourage partners to begin reporting any new CAP funded BMPs through PracticeKeeper immediately.
- To ensure compliance with CAP grant requirements, please take the time to upload a timestamped photo for each BMP currently entered in FieldDoc. DEP staff will be conducting a review of all CAP-funded projects on December 2, 2024, to verify that timestamped photos are included for all FieldDoc-reported practices. If any projects are missing these photos, your DEP CAP project advisor will reach out to the relevant partners for follow-up.

Dates to Remember

SCC Meetings – 10:00 AM

- Hybrid Meeting.....Jan 21
- Hybrid MeetingMar 18

SCC Conference Calls – 8:30 – 10:00 AM

- Conference Call.....Dec 10
- Conference CallFeb 18

Also, check the Conservation District Training/Special Events Calendar at, www.PACD.org. Select the "Events" tab and then the "Training Calendar" tab.

75th Anniversary Recognition

Directors and Associate Directors, we would like to present each of you with a 75th Anniversary recognition shirt as the District celebrates this momentous year in 2025. An email will be sent to you in December with a link to select the type of shirt and size you'd like. Shirts will be presented at the January 22 Board meeting.
